

(from NIST PUB 772)  
Federal Information  
Processing Standard 6-4  
1990 August 31

Specifications for  
COUNTIES AND EQUIVALENT ENTITIES  
OF THE UNITED STATES, ITS POSSESSIONS,  
AND ASSOCIATED AREAS

1. Name of Standard. Counties and Equivalent Entities of the United States, Its Possessions, and Associated Areas.

2. Category of Standard. Federal General Data Standard, Representations and Codes.

3. Explanation. This standard provides the names and codes that represent the counties and other entities treated as the equivalents of counties for legal and/or statistical purposes in the 50 States, the District of Columbia, and the possessions (American Samoa, Guam, Northern Mariana Islands, Palau, Puerto Rico, and Virgin Islands of the United States) and freely associated areas (Federated States of Micronesia and Marshall Islands) of the United States. Palau is the last remaining component of the Trust Territory of the Pacific Islands (TTPI); for presentation purposes, Palau, rather than the TTPI, is treated as the State-equivalent entity.

The term "counties" refers to the "first-order subdivisions of each State and statistically equivalent entity, regardless of the local terminology (county, parish, borough, etc.). First-order subdivisions of the States include the parishes of Louisiana; the boroughs and census areas of Alaska; the independent cities of Maryland, Missouri, Nevada, and Virginia; and the portion of Yellowstone National Park in Montana. In the possessions, entities regarded as first-order subdivisions are as follows: American Samoa: districts and islands (the areas legally designated as "counties" in American Samoa are second-order subdivisions); Northern Mariana Islands: municipalities; Palau: states; Puerto Rico: municipios; Virgin Islands: islands (comprising the three major islands). The District of Columbia and Guam have no first-order subdivisions, and therefore these same areas serve as the first-order subdivisions. First-order subdivisions of Federated States of Micronesia are states; of Marshall Islands, municipalities.

4. Specifications. The succeeding pages of this standard provide a list, by State, of the names and codes of the counties and equivalent entities. The States and the District of Columbia are listed in alphabetical sequence; the possessions are listed alphabetically in Appendix A, and the associated areas in Appendix B. Within each State and statistically equivalent entity, the counties or equivalent entities are listed in alphabetical sequence except for independent cities, which comprise a separate alphabetical and numeric (code) sequence following the list of counties in their respective States. This list of first-order subdivisions provides complete coverage of the United States and its possessions and associated areas.

5. Qualifications. County codes are assigned uniquely within each State and equivalent entity. In other words, counties in different States will have the same code; for example, code 001 is assigned to both Autauga County, Alabama and Apache County, Arizona. Accordingly, in data systems concerned with the identification of counties in more than one State, the county code must be used in conjunction with Federal Information Processing Standard 5, Codes for the Identification of the States, the District of Columbia and the Outlying Areas of the United States, and Associated Areas. Autauga County, Alabama would be represented as AL001 and Apache County, Arizona would be represented as AZ001 when the State alphabetic codes are used; and as 01001 and 04001, respectively, when the State numeric codes are used. The form of representation (State alphabetic or numeric code) is to be identified in format descriptions for those data systems that use the representations described in this standard.

The legally defined first-order subdivisions of Alaska are called boroughs. The portion of Alaska that is not within organized boroughs is covered by a single "unorganized borough," a legal entity administered by the State government. Because the unorganized borough is too large geographically to provide a suitable basis for data analysis, the State of Alaska and the Bureau of the Census have divided it into census areas for statistical purposes. The census areas are identified in the list by "(CA)" following the name. Data systems that use the unorganized borough may code it as 999. Changes since FIPS PUB 6-3: Aleutian Islands (CA) (010) was replaced by Aleutians East (1987 October 23) and Aleutians West (CA) (1990 January 1); Kobuk (GA) (140) was replaced by Northwest Arctic (1986 June 2); Lake and Peninsula was established from part of Dillingham (CA) (1989 April 24). (The relationships are approximate.)
